Career Objective

I am a B.Tech Artificial Intelligence and Data Science graduate (CGPA 8.1/10) with hands-on experience building AI/ML applications, LLM-powered systems, REST APIs, and interactive dashboards. Skilled in Python, SQL, model evaluation, and full-stack development.

Technical Skills

Languages: Python, Java (Basics), SQL

LLM APIs: Gemini API, ChatGPT, Claude, OpenAI-Compatible Endpoints

AI/ML: PyTorch, Scikit-learn, Hugging Face, RAG, LoRA Fine-Tuning, NLP, Whisper

Backend & Frontend: FastAPI, Flask, React.js, Node.js, Express.js, HTML, CSS, Tailwind CSS

Data & Databases: Pandas, MySQL, SQLite, MongoDB

Tools & Deployment: Git, GitHub, Docker, Postman, AWS EC2, GitHub Actions, Vercel

Internship Experience

Machine Learning Intern | Prodigy Infotech, Mumbai

April 2024 – May 2024

- Developed and evaluated ML models using data preprocessing, feature engineering, and algorithm optimization. Got Letter of Recommendation

Deep Learning Intern | Phoenix Soft Tech, Madurai

August 2024 – September 2024

- Implemented ANN and SVM models for predictive analysis and developed a desktop application integrated with MySQL

Projects

GitContext RAG – Codebase Q&A Copilot

Python | FastAPI | Sentence-Transformers | rank-BM25 | Gemini API | GitPython

- Built a RAG-based tool to answer GitHub codebase questions using hybrid retrieval, reranking, and file-level citations.

VoicePrint LID – 102-Language Audio Identifier

Python | PyTorch | Hugging Face Transformers | Streamlit | soundfile | SciPy

- Developed a multilingual audio classification system using Whisper to identify spoken languages from audio uploads and URLs.

Phytoplankton Detection

Python | PyTorch | YOLOv8 | ConvNeXt | CBAM | Vision Transformer

- Developed a microscopic image detection and classification system with ecological risk assessment and approximately 34.7 ms inference time.

Inbox Intel – Live Support-Desk Intelligence over Gmail + SMS

Python | FastAPI | React | TypeScript | SQLite | Docker | Twilio | IMAP

- Built a support-message analysis platform with intent classification, confidence-based model routing, and improved accuracy from 76.6% to 86.3% across 900 test messages.

Certifications

- IBM – Machine Learning with Python (Coursera), NIELIT – Advanced Machine Learning
- Research Publication: International Journal of Science, Strategic Management and Technology
